What is Interaction Training?
Interaction training helps individuals working with students who are deafblind with multiple disabilities learn to identify and strengthen nonverbal cues and signals between themselves and their students and improve social development and expressive communication skills in non-verbal interactions.

Coaching the Teams
TSBVI coaching teams are guided through video analysis of interactions between educators and students by Bernadette van den Tillart.

TSBVI teams apply techniques and terminology learned in coaching sessions with Bernadette to help guide instructional teams through a process of video analysis in order to help them identify and improve their interaction patterns with students.
Coaching the Coaches

TSBVI coaches are guided through a self-analysis of recorded coaching sessions to improve their ability to model interaction protocol when helping lead teams through the interaction training process.
