

# VI and O&M Preparation

Information about how to become a VI teacher or O&M specialist

FEBRUARY 2009

## Teachers for Visually Impaired Students and Orientation & Mobility Specialists Certification Training in Texas

### What is VI Preparation in Texas?

Certification to work with students with visual impairments is available, regardless of where you live in Texas. Training is provided through Texas Tech University, Stephen F. Austin State University, and on alternate years through Region 2 Education Service Center.

For more information about this flyer, please contact:

#### General information

KC Dignan, Ph.D.  
Texas School for the Blind and  
Visually Impaired  
1100 W. 45th St.  
Austin, TX 78756  
Phone: 512-206-9156  
kcd@tsbvi.edu  
**Website:**  
www.tsbvi.edu/pds/newsletter.  
htm

#### Stephen F. Austin State University

Frankie Swift  
Stephen F. Austin State University  
936-468-5511  
fswift@sfasu.edu  
or  
Dixie Mercer, Ed.D. (VI)  
Stephen F. Austin State University  
936-468-1142  
dmercerc@sfasu.edu  
**Website:**  
[http://faculty.sfasu.edu/mercerdixie/program\\_page2/home.htm](http://faculty.sfasu.edu/mercerdixie/program_page2/home.htm)

#### Texas Tech University

Rona Pogrud, Ph.D (VI)  
Texas Tech University  
(806) 252-8026  
(512) 206-9213 (TSBVI)  
[rona.pogrud@ttu.edu](mailto:rona.pogrud@ttu.edu)  
or  
Nora Griffin-Shirley, Ph.D. (O&M)  
Texas Tech University  
806-742-1997 (voice mail: ext. 247 or  
233)  
n.griffin-shirley@ttu.edu  
**Website:** : [www.educ.ttu.edu/sowell/](http://www.educ.ttu.edu/sowell/)

### Who should read this?

- Have you been thinking about a career change? **Are you interested in teaching, but want a non-traditional setting and job assignment?**
- Do you have an interest in working with children with visual impairments (VI)?
- Have you considered being a VI teacher or an orientation and mobility (O&M) specialist, but don't know how to get certified or get training?
- Are you an independent worker who is active in teams, a good problem-solver, and eternally curious?

**Then a career working with students with visual impairments might be for YOU!**

## What is in this packet?

Beginning your career as a VI teacher or O&M specialist through a university program has at least two steps: being accepted in a participating university and being accepted by the certification program. This packet has the following information you need to begin this process:

1. *Teachers for Students with Visual Impairments and Orientation and Mobility Specialists Training in Texas* (this document),
2. *Typical Roles and Responsibilities of VI Professionals* (white). Read this prior to submitting the university application.

## What are my career or training options?

As a VI professional you have two options:

- teacher of students with visual impairment (VI teacher, or TVI),
- orientation and mobility specialist (O&M specialist).

To learn more about these professions, please read *Typical Roles and Responsibilities of VI Professionals*, which is the white document included in this packet.

## What are the training prerequisites?

You may seek certification as either a VI teacher or an O&M specialist. Each is a separate profession with separate professional standards. The prerequisites will vary depending on the training option you choose:

### VI TEACHER

- Teaching certificate, preferably in special education, elementary, or secondary education, and
- Bachelor's degree from an accredited university

### O&M SPECIALIST

- Bachelor's degree from an accredited university

**NOTE:** Stephen F. Austin has an undergraduate program in VI and O&M. The program is conducted on their campus in Nacogdoches. Contact SFA staff for more information.

## What will I be studying?

The specific program of study will depend on the training option (VI or O&M) and on other additional factors. Below is a basic listing of course topics. Exact course titles will vary by university and training option.

### COMMON COURSES (FOR ALL VI PROFESSIONALS)

All students will take the following courses:

- Foundations in Visual Impairments
- Structure and Function of the Visual System (Anatomy)
- Methods for Students with Multiple Impairments
- Basic Orientation and Mobility

### VI TEACHER

In addition to the common courses, the VI certificate program includes:

- Braille
- Academic Methods, and
- Internship/Practicum.

If you are not certified in special education you must complete a survey of exceptionalities course. You will need to coordinate your specific needs with your university advisor.

## O&M SPECIALIST

In addition to the common courses, the O&M program of study required additional coursework. SFA and TTU address the same competencies; however they arrange their courses a bit differently.

### TTU

- O&M Seminar (6 credit hours)
- 'Blindfold' or 'Cane' (6 credit hours)
- O&M Internship (350 supervised hours)

### SFA

- 'Blindfold' or 'Cane' (6 credit hours)
- Beginning Internship (3 credit hours)
- Intermediate Internship (3 credit hours)
- Advanced internship (6 credits, 350 supervised hours)

If you already hold a VI certificate and were trained at a university and have already taken the common courses, you will not need to take them again. O&M specialists are not required to hold any educational certifications.

## How much will the program cost? Is financial assistance available?

Both SFA and TTU have funds to assist with the cost of tuition. Each university distributes funds according to university program guidelines. The specific method used and amount of stipends vary by university. It is possible that there may be a waiting list to access funds. You should discuss it with your faculty advisor. You will be responsible for ordering and paying for your books.

If travel to either university is involved, **funds may be available** to facilitate the travel. The amount and specific method used to administer those stipends varies by university. You should discuss this with your faculty advisor.

**Important for the 2008-2009 year:** TTU will have *very* limited funds for students enrolling in the Summer 2009 semester. Priority for funds will be given to those students who are already taking courses. As funds become available, priority will be given to students who are enrolled, but not receiving a stipend from TTU. Additional stipend funds for new students should be available for fall 2009 entry.

You may be able to receive additional assistance from your district, a private foundation in your area, or your educational service center. You may also contact the TTU Financial Aid office for more information about loans or scholarships. You are encouraged to contact your special education director and your educational service center.

SFA accepts students one time a year. They do not anticipate financial restrictions admitting their Spring 2009 cohort.

## How are courses offered?

Courses are offered through a blend of distance learning strategies, such as interactive television (ITV), Internet, and face-to-face activities. The exact blend will depend on your location, the university and the specific course. For more information, you should contact the universities listed on the first and last pages of this newsletter.

## What are "distance learning" and "ITV"?

Basically, distance learning means the instructor and the learners are not in the same room. There are many kinds of distance learning opportunities. VI programs in Texas primarily rely on two systems: an **interactive television system (ITV)** and the Internet. These are supplemented with email, chat and/or discussion rooms, phone conferences, and face-to-face meetings.

A sample of interactive television system is the Texas Educational Telecommunication Network or TETN. During an ITV session and/or class, all of the participants travel to the TETN room at the participating ESC. During the class, people are able to see, talk to each other, and participate in class projects and presentations.

Another facet of distance learning is the Internet. All of the courses will have some reliance on the Internet; some courses will be entirely based on using the Internet. During Internet courses each participant will determine the 'time and place' for class. Even though participants have the flexibility to set their own schedule, for successful completion it is important that you set and maintain a schedule. Some courses have a weekend component either in Lubbock or Austin.

One face-to-face course is offered by Texas Tech University each semester during the academic year. This course meets every other Saturday at the Texas School for the Blind and Visually Impaired in Austin. For this schedule, please check with the faculty at TTU.

#### THE BENEFITS INCLUDE:

- The opportunity to receive instruction and course credit from well-known universities.
- The opportunity to take courses (relatively) close to home.
- The opportunity to take courses on weekends (or possibly evenings) without leaving your family or job.
- The opportunity to develop lasting relationships with fellow preservice professionals as you jointly complete this intense, exciting training option.

## Should I contact my regional education service center?

Each regional service center has at least one VI contact. You are **strongly encouraged** to contact the VI consultant at your regional service center (ESC) for various reasons.

- The VI person or team will be a source of support and resources for you in the future. Why not start the relationship early?
- If you take courses that have an ITV component, you *must* make sure that your region is participating.
- Most VI programs at your regional service centers have resources that may be helpful. These may include reference materials, journals and specialized equipment.
- VI programs sponsor workshops at the service center. They also help support professional development for VI professionals in their region. "Support" may include travel assistance to attend statewide conferences.
- Someone at the ESC may be your mentor. Start the relationship on a positive, pro-active note by letting them know about you.

If you would like to find out about more about regional VI services, the VI staff or other information, go to the TSBVI website and click on your region. You can find a map and a link to the list of VI professionals at the regions at: [www.tsbvi.edu/Education/esc.htm](http://www.tsbvi.edu/Education/esc.htm)

## Who should apply?

Of course, you must have an interest in and a commitment to working with children with visual impairments. Most VI professionals work as itinerant professionals. Therefore, as a VI teacher or an O&M specialist you must be prepared for on-the-job travel.

In addition, you must realize that this is an **intense** program. The instructional content is exactly the same as traditional courses on campus. While the length of instruction is the same, ITV courses will have fewer meetings (but for more hours each time). Internet courses also require a substantial time commitment.

## How do I apply?

Each university has specific requirements and procedures. You must contact the faculty at the university or visit their web site for information. You can find more information at the following sites:

#### SFA

[http://faculty.sfasu.edu/mercerdixie/program\\_page2/home.htm](http://faculty.sfasu.edu/mercerdixie/program_page2/home.htm)

**NOTE:** SFA only accepts students into the VI program in the spring of each year. New students take all of their courses as a group, starting in the summer of 2009 and are referred to as a “cohort”. The deadline for application to the 2008 -09 cohort is **March 19, 2009**.

## TTU

### 1. APPLY TO THE GRADUATE SCHOOL

- a. Go to <http://www.depts.ttu.edu/gradschool/admissions/how.php> and follow the instructions to apply to the Graduate School. There is a \$50 application fee and it can be completed online. If you have questions about this application call Graduate Admissions at 806-742-2787.

### 2. APPLY TO THE COLLEGE OF EDUCATION

- a. Go to <http://www.educ.ttu.edu/certification> and go to #1 and select PostBac Application. Scroll to the bottom and click on new application. Then click on Professional/Supplemental at the bottom of the page. Complete the application, choose supplemental at the bottom and then choose the applicable program VI or O&M, then click on submit. For questions about this application call Dr. Rosita Moore at 806-742-1998 x441 or email at [rosita.moore@ttu.edu](mailto:rosita.moore@ttu.edu).
- b. \*\*If you are interested in seeking a Master’s degree in Special Education you need to go to [http://www.educ.ttu.edu/sowell/student/master\\_app\\_process.php](http://www.educ.ttu.edu/sowell/student/master_app_process.php). For questions about this application call Esther Lucey @ 806-742-1998 x433 or email her at [esther.lucey@ttu.edu](mailto:esther.lucey@ttu.edu).

### 3. APPLY TO THE REACH ACROSS TEXAS PROGRAM

- a. Go to [http://www.educ.ttu.edu/sowell/grants\\_projects/RATP/reachAcrossTexas.php](http://www.educ.ttu.edu/sowell/grants_projects/RATP/reachAcrossTexas.php). Click on the Reach Across Texas Application in the 3rd paragraph. This application needs to be printed out and faxed to 806-742-2326 or mailed to the Sowell Center at the address below my signature. For questions about this application you can talk to Robin Rekieta at 806-742-1997 x251 or Anita Page at 806-742-1997 x227.

**NOTE:** You should order an **official copy of your university transcript(s)** to be sent directly to the university as soon as possible – even if you have not completed your university or program application. Sometimes it takes time to have your request processed and sent. Don’t let this hold up your application.

## Can I get a master’s degree?

Getting a master’s degree is an important and admirable goal. It should be considered fully. Both Stephen F. Austin and Texas Tech universities offer master’s degrees in education (M.Ed.).

The courses described here will contribute to certification as a VI professional; either as a VI teacher or O&M specialist. The courses will not provide all of the requirements for a master’s degree in either of those areas.

If you want a master’s degree you must meet the following conditions:

- Take (or have taken) the Graduate Records Exam (GRE),
- Comply with other university entrance requirements (will depend on specific university),
- Declare your intention to that university, and
- Complete course work beyond the field of visual impairments, possibly on the campus of the university in which you are enrolled (TTU students will be able to complete most of their courses on-line. SFA students may be required to spend time on-campus. Contact SFA for more details.)

If you are considering this, please contact faculty at either university. Please note the grant provides support for certification courses. Students seeking a masters degree will need to seek funding elsewhere.

## What if I am not certified in special education?

### VI TEACHER

If you do not have a special education certification you are still eligible and are encouraged to begin your career as a VI teacher. However, if you have not already done so, you must complete a ‘Survey of Exceptionalities’ course.

These courses are available from a large number of universities. You will consult with your university advisor for additional information. You do, however, need to have some type of initial teaching certificate to add the VI Supplemental Certificate.

#### **O&M SPECIALIST**

O&M specialists are not required to have a teaching certificate of any kind.

## **What are the acceptance criteria?**

**The goal of this program is to train and employ VI professionals to work with VI students. Therefore, in order to be accepted, you will have to make a commitment to work with children with visual impairments.**

Each university has specific acceptance criteria and procedures. These are also affected by whether you want certification-only, or want a master's degree. Also, each university has timelines for submitting documentation. **You must contact the university of your choice for requirements and timeline information.** Contact information is on the first and last pages of this newsletter.

## **Can I get an emergency or probationary certification?**

#### **VI TEACHERS:**

Reauthorization of Individuals with Disabilities Education Act (IDEA) was signed into law in November 2004. This new reauthorization of IDEA made changes to professional requirements for those working with children with disabilities. Emergency permits are discouraged and often not used by districts. However, it may be possible to get a probationary certificate.

TTU and SFA have a VI probationary certification program that requires the completion of two specified courses and enrollment in a third before applying for the probationary certification as a VI teacher. This program allows individuals to serve as a VI teacher in their district with the agreement that they will then complete the remainder of the courses required for full certification as a TVI.

Contact SFA or TTU for information about their probationary certificate program.

## **How will the didactic portions of the courses be taught?**

The courses are a blend of didactic (or lecture-type information) and skill-based learning. The didactic portion will be taught through a blend of the following methods: Internet, ITV and face-to-face meetings. More information about the skill-based training follows:

#### **ITV/TETN**

ITV (interactive television) sessions will require you to travel to a participating ESC. Please note that not all ESCs participate in ITV courses. ONLY SFA uses the ITV system. You should contact your service center prior to sending your application to SFA. For the instruction, you will sit in a room with other students and participate in discussions via an interactive audio-visual device that looks like a TV. You will be able to speak directly to the instructor and students at other sites.

#### **INTERNET**

The Internet is used throughout the programs; either for all of a course or some part of all courses. The instructor will be available via phone, discussion and/or chat rooms, email, and correspondence.

You will be able to participate in the Internet-based courses and activities at your convenience. Specific deadlines will be set for each module or unit. You must meet the deadlines; this isn't an independent study course. It will be very important for you to develop and stick to a schedule. Because of the large amount of information included in these courses and demands on our time that we all face, getting and keeping a schedule will be an important part of your experience. If you don't do this, you will find it difficult to complete your requirements in a timely fashion.

#### FACE-TO-FACE

Unless you are participating at an outreach site such as the TTU Saturday classes at TSBVI, the face-to-face components will be limited and may be restricted to the skill-based portion of the training.

## How will the skill-based portions of the training be taught?

The Basic O&M (taken by all VI professionals) and the Cane (taken by O&M specialists) courses have skill-based components that are taught face-to-face.

#### BASIC O&M

During Basic O&M students will meet with a facilitator for approximately 20 hours of instruction. Scheduling will vary from site to site. The skill-based training will be conducted at a university or an outreach site. Please talk to university faculty about the possible locations of the outreach sites.

#### CANE COURSES

O&M specialists take 6 credit hours of instruction on how to use the cane while under blindfold. SFA offers a single 6-hour course, and TTU offers two separate 3-credit courses.

The cane courses (Cane I and Cane II) must be conducted on a face-to-face basis. These courses will be offered at the TTU and SFA campuses and in any region (or combination of regions) that has sufficient students. **Pending availability to funds** students who attend these courses **on-campus** will be provided with a stipend to cover **some** of their tuition and assistance for housing and/or travel.

#### ANATOMY OF THE EYE

At TTU, the eye course requires a weekend in Lubbock for hands-on and interactive training such as dissecting a cow's eye, learning how to do a functional vision evaluation and a learning media assessment, using optical devices, etc.

#### ACADEMIC METHODS

The Academic Methods course for VI teachers at TTU requires a weekend in Austin for the Assistive Technology component of the course which includes hands-on learning about the latest technological advances used with students with visual impairments.

#### PRACTICUM OR INTERNSHIP

The VI and O&M training options both require field experiences, known as either a practicum or internship. These will be arranged on an individual basis. When possible, the practicum/internship will be in the local area. However, each practicum/internship experience must meet certain basic requirements. **As a result, it may be necessary to travel from your existing job location for a portion or all of the practicum/internship. It is possible that O&M specialists will need to go out of Texas.**

##### O&M internship

In O&M, the field experiences (internship and practicum) are completed under the supervision of an Academy certified O&M specialist who meets the criteria for internship supervisors and who has been selected by the university to do so. Internship involves providing orientation and mobility services on a full-time basis. **This important experience usually happens away from your home community.** Faculty will make all arrangements.

##### VI practicum/internship

VI teachers complete a practicum/internship, which will be supervised by an experienced VI teacher who has been designated by the university to do so. During that period you will need to work as a VI teacher, completing a series of professional experiences. It is possible that you will need to travel beyond your district for a limited period of time in order to complete those experiences. For example, if there are no braille readers in your district, you may need to travel to a district that has braille readers to observe and interact with students who read braille. . Some students in the probationary certification program already have a job as a TVI and are able to do some or all of their internship hours with their own caseload on the job.

## When will courses be taught?

### INTERNET

Internet courses and activities have deadlines, but no specific dates for classes. You will determine the specific times when your learning occurs. However, it is very important that you set a schedule and stick to that schedule.

### ITV

The only courses that will use the ITV system are being taught by SFA. These courses will require you to go to participating ESC on specific dates. Contact SFA faculty for specific schedules.

## Does it make a difference which university I attend?

### GENERAL INFORMATION

**BOTH UNIVERSITY PROGRAMS ADDRESS THE SAME SET OF PROFESSIONAL COMPETENCIES, RESPOND TO THE SAME SET OF ACCOUNTABILITY MEASURES, AND OFFER TRAINING WHICH WILL ENABLE YOU TO BE CERTIFIED AS EITHER A VI TEACHER OR O&M SPECIALIST.**

There are differences. You must evaluate both programs and determine which best meets your needs. Stephen F. Austin only admits new students in the summer semesters. This block of students, known as a cohort, take classes together via the Internet and ITV systems. Texas Tech University accepts new students year round and offers courses predominately via the Internet.

**IMPORTANT** additional information is available from both universities. You should contact both universities to determine which is the best for your situation. You can find information on their websites. The addresses are:

### SFA

[http://faculty.sfasu.edu/mercerdixie/program\\_page2/home.htm](http://faculty.sfasu.edu/mercerdixie/program_page2/home.htm)

### TTU

[www.educ.ttu.edu/sowell/](http://www.educ.ttu.edu/sowell/)

### MASTER'S DEGREE STUDENTS

If you are interested in getting a master's degree as a VI teacher and/or an O&M specialist, you must discuss this with the faculty at SFA and TTU. Each university has different requirements. SFA students *may* need to complete some of your semester hours on the university campus. Contact them for more information. TTU students will be able to complete most or all of your coursework via on-line courses.

In order to help you make that decision, you should contact each university to discuss their application and acceptance policies. It will not be necessary to declare whether or not you are seeking a degree during the first semester; however you should be actively exploring this possibility as soon as possible. If you are at all interested in seeking a degree, you should start as a "degree seeking" student. It is easier to move from "degree seeking" status to "certification only" status than to do the reverse.

## I heard braille is hard. Is it?

Braille is a new code to most pre-service professionals. As such, it can be a challenge. Learning braille is like learning a new code; not another language, but a new system for English. The key to mastering braille is the necessity for *daily practice*, every day, even on weekends. Sighted VI professionals learn braille visually, not tactually as a student with a visual impairments does.

All VI teachers must learn braille in order to be fully certified and to have access to a probationary certificate. You will be required to take a Braille TExES exam. You will be able to take the Braille TExES exam shortly following the completion of the Braille course.

Like all of the courses in the sequence, the Braille course is **EXTREMELY RIGOROUS** in any situation, and even more so when taught in a condensed fashion, such as during a Summer Session.

If you are considering taking the Braille course over the summer, the course will be condensed. If you will not have several hours to devote to braille each day (including weekends), it would be advisable to wait until the course is offered during the long semester. If you take it from SFA over the ITV during the summer, plan on traveling to the ESC two times a week.

## How will I get my textbooks?

It is important that you have all your textbooks **before** the first day of class. Students will need to purchase their own textbooks. Your district or ESC may be able to help with some of the costs. The textbooks will then become part of your permanent professional library.

You must order your own textbooks and materials. You can usually do this through university bookstores or Amazon.com or other web-stores or directly from the publishers. Books published by TSBVI can be ordered from TSBVI ([www.tsbvi.edu/publications/index.htm](http://www.tsbvi.edu/publications/index.htm)). It is critical that you register for each course as soon as possible. A list of required textbooks is available from each university. You will be at a significant disadvantage if you start the semester without your books. Even missing a single class will put you behind.

## What are the deadlines for enrollment?

Remember, there are at least **TWO** steps you must complete:

- Applying and being accepted by the university,
- Being accepted into the College of Education Post Bac Certification Program at TTU.

**AND**

1. Being accepted to the *Reach Across Texas* Program at TTU or *Project Vision* as SFA,

These are separate procedures. You **MUST** complete all of the steps according to the chosen university's procedures. To learn more about the steps for enrolling in the university, visit the websites for the VI programs at SFA and TTU.

### TEXAS TECH UNIVERSITY (TTU)

Texas Tech accepts students throughout the year although the majority of TTU students begin the program in the fall semester. You must apply to the university and to Reach Across Texas no later than **June 1, 2009 for the Fall 2009 semester**. Once accepted, you must register for the designated courses. For more information visit: [http://www.educ.ttu.edu/sowell/grants\\_projects/RATP/reachAcrossTexas.php](http://www.educ.ttu.edu/sowell/grants_projects/RATP/reachAcrossTexas.php)

### STEPHEN F. AUSTIN STATE UNIVERSITY (SFA)

At SFA VI professionals take their courses as a group, or cohort. This means that everyone starts together and takes their classes together. The cohort is accepted in the spring of 2009 and start courses the first summer session. You must apply no later than **March 19, 2009**.

**SFA – DEADLINE FOR ADMISSION TO THE 2009 VI & O&M COHORTS: MARCH 19, 2009.**

**TTU – DEADLINE FOR ADMISSION FOR SUMMER 2009 – APRIL 1, 2009**

**TTU – DEADLINE FOR ADMISSION FOR FALL 2009 – JUNE 1, 2009**

## Will I need to get my transcripts?

Yes. You will need to arrange for a copy of your official transcripts to be sent to the university of your choice. The holder of your transcripts (all previously attended universities) will send them directly to SFA or TTU. Since it may take time for your request to be processed, you are strongly advised to start this process **as soon as possible**. **Do not wait!** You might miss a deadline!

## Will I have a mentor?

We are committed to the mentor program. All participants will be paired with a trained, experienced professional. To the degree possible, the mentor will be from your home region.

Together you will complete a series of experiences designed to further enhance your learning and your understanding of children with visual impairments. Your mentor will also be available for questions and concerns.

This is a non-evaluative mentor program. This means that your mentor will not be called upon to provide an evaluation of your skills, either by the university or your district. This is a person to whom you can turn when you have questions and/or concerns about content or skills.

## When will courses be offered?

### Texas Tech University

#### Summer I (May 27 – June 27, 2009)

Cane I & II (TTU campus in Lubbock)

Braille (6 weeks- May 27- July 8) (Internet)

O&M Internship (off campus; sites vary)

#### Summer II (July 7- August 7, 2009)

Foundations (internet)

Basic O&M (internet + on-campus weekend)

O&M Internship (Off campus; sites vary)

#### Fall 2009

Eye Anatomy (Internet + on-campus weekend)

Braille (Internet)

Basic O&M (Internet + on-campus weekend)

Basic O&M (face-to-face- Austin)

Multiple Disabilities Methods (internet)

Intermediate O&M Seminar (Internet)

O&M Internship (Off campus; sites vary)

VI Internship (Off campus; sites vary)

### Stephen F Austin

#### Summer

Anatomy

Braille

Practicum in O&M (3 to 6 hours)

Advanced Clinical Practicum in O&M (6 hours)

#### Fall

Foundations

Methods in visual and multiple impairments

VI Practicum

Practicum in O&M

(3 to 6 hours)

Advanced Clinical Practicum in O&M (6 hours)

#### Spring

Basic O&M

Academic Methods

Practicum in VI

Practicum in O&M (3 to 6 hours)

Advanced Clinical Practicum in O&M (6 hours)

## Let's review your action steps

- 1 **Read** the enclosed *d Typical Roles and Responsibilities of VI Professionals* (white).

2. **Determine** which university program fits best with your lifestyle and learning style, and other factors. Contact each university for more information.
3. **Send** for an OFFICIAL copy of your transcript(s).  
You may choose to have the transcripts sent directly to the university.
4. **Apply** to the university of your choice. You will find links so that you can apply online at:
  - SFA: [http://faculty.sfasu.edu/mercerdixie/program\\_page2/home.htm](http://faculty.sfasu.edu/mercerdixie/program_page2/home.htm)
  - TTU: [www.educ.ttu.edu/sowell/](http://www.educ.ttu.edu/sowell/)
5. **Talk to your** advisor at the university.  
This is likely to be one of the university faculty listed below.
6. **Register** for the first course.
  - TTU students: Your advisor will help you to understand what course and the procedures for completing this step on-line.
  - SFA students: Do not register. SFA will do the student registering for you.
7. **Complete** all of the scheduled activities.

## How can I get more information?

If you want more information, or have a special circumstance, *please do not hesitate to contact:*

# Typical Roles and Responsibilities of VI Professionals

Taken from *Quality Programs for the Visually Impaired*, developed by Nancy Toelle

The **Teacher of Visually Impaired Students (TVI)** has the following roles and responsibilities:

- o Has primary responsibility for specialized instruction and services required to meet the unique educational needs of her visually impaired students.
- o Possesses the skills and abilities necessary to provide and coordinate this specialized instruction.
- o Assists the student, parents, special and regular education personnel, and the student's sighted peers in
  - understanding the unique educational needs and learning characteristics of visually impaired students,
  - becoming aware of services and support available from local programs for visually impaired students,
  - acquiring information regarding local, state, and national resources for the education of visually impaired students, and
  - interpreting the visually impaired student's specific eye condition, the educational implications of the visual impairment, and the results of functional vision and learning media assessments.
- o Consults regularly with the classroom teacher, other regular and special education personnel, parents, and others to coordinate programs and services for the visually impaired student.
- o Assists the site administrator and teachers in making environmental adjustments for the student in the school.
- o Shares responsibility with classroom teachers in the identification of instructional areas in which the student requires assistance.
- o Assures that large-type or braille texts, supplementary materials, educational aids, and equipment needed by the visually impaired student, and the classroom teacher, are provided in a timely manner to ensure the student's maximum participation in all classroom activities (appropriate educational materials may be prepared or adapted by the VI teacher, or they may be obtained from educational, clerical, or transcriber services.)
- o Provides instruction in the development and maintenance of skills to meet the student's unique educational needs in the following areas, as indicated in the IEP:
  - low vision & visual efficiency skills,
  - concept development & academic skills,
  - daily living skills,
  - career & vocational education skills,
  - communication skills (these skills include braille reading and writing as appropriate),
  - social/emotional skills and abilities, & sensory motor skills.

- o Prepares sequential and meaningful instruction geared to the student's assessed needs, IEP goals and objectives, functioning, and motivational levels. This instruction should be reflected in weekly or monthly lesson plans, as appropriate.
- o Provides assistance to the classroom teacher in academic subjects and activities of the classroom that, as a direct result of the student's visual impairment, require adaptation for the student.
- o Provides initial and ongoing assessment:
  - consults with assessment team to determine appropriate testing materials and modifications needed,
  - assists with assessments when needed,
  - interprets assessment results when needed.
- o Conducts functional vision/learning media assessments and produces written reports.
- o Attends ARD and IEP meetings for students with visual impairments.
- o Schedules time efficiently for assessment, instruction, planning, preparation of materials, travel, and conferences with relevant school and other key individuals.
- o Maintains ongoing contact with parents to assist them in the development of a realistic understanding of their child's abilities, progress, and future goals.
- o Provides in-service training programs for school personnel and students and education for parents regarding the needs of visually impaired students and adaptations, programs, and services for these students.
- o Makes available pamphlets, films, and other public information materials that may be useful in developing realistic and unprejudiced attitudes toward visually impaired students.
- o Coordinates with other personnel, such as transcribers, readers, counselors, O&M specialists, career/vocational education staff, and rehabilitation counselors.
- o Maintains a current reference library of professional materials and resources.
- o Acquires information and training about current research, development, and technology.

The **Classroom Teacher (regular, special class, or resource specialist)** has the following roles and responsibilities:

- o Provides instruction in appropriate academic and non-academic content areas to the visually impaired student in the classroom.

- o Works cooperatively with the teacher of visually impaired students to
  - identify the student's areas of educational need, including unique education needs,
  - coordinate instruction and services to meet these needs,
  - provide, in a timely manner, classroom materials that need to be reproduced in another medium,
  - determine mutually convenient times during the school day for scheduling the teacher of visually impaired students to work with the student,
  - modify classroom procedures and environment to meet the specific needs of the visually impaired student for participation in classroom activities, and
  - exchange information concerning the visually impaired student with parents and other individuals on a regular basis.

The **Orientation and Mobility Specialist** has the following roles and responsibilities

- o Instructs the visually impaired student in the development of skills and knowledge that enables him or her to travel independently, based on assessed needs and ability.
- o Teaches the visually impaired student to travel with proficiency, safety, and confidence in familiar and unfamiliar environments.
- o Consults regularly with sighted peers, parents, classroom teachers, physical education teachers, and/or other special education personnel to assist in home and classroom environmental modifications, adaptations, and considerations and to ensure reinforcement of appropriate O&M skills that will encourage the visually impaired student to travel independently in these settings.
- o Works with the teacher of visually impaired students to conduct the functional vision assessment as it relates to independent travel.
- o Conducts assessments that focus on both long and short-term needs of the student.
- o Includes in the assessment report the needs and strengths of the student and an estimate of the length and frequency of service necessary to meet identified needs.
- o Prepares sequential and meaningful instruction geared to the student's assessed needs, IEP goals and objectives, functioning, and motivational levels. This instruction should be reflected in weekly or monthly lesson plans, as appropriate.
- o Prepares and uses equipment and materials, for example, tactile maps, models, distance low vision devices, and long canes, for the development of O&M skills.
- o Transports the student with parent permission to various community locations, as necessary, to provide meaningful instruction in realistic learning environments.

- o Is responsible for the student's safety at all times and in all teaching environments while fostering maximum independence.
- o Evaluates the student's progress on an ongoing basis with progress reports each 6/9 weeks as required.
- o Keeps progress notes on each student.
- o Participates in necessary parent conferences and meetings.
- o Provides inservice training to regular and special education personnel, sighted peers, and parents concerning the O&M needs of the student and appropriate methods and procedures for interacting with the visually impaired person that will foster maximum independence and safety.
- o Provide O&M instruction, where appropriate, in a number of specific areas:
  - body imagery,
  - laterality,
  - environmental concepts,
  - gross and fine motor skills related to independent travel,
  - sensory awareness, stimulation, and training,
  - spatial concepts,
  - compass direction concepts,
  - sighted guide procedures
  - basic protective and information-gathering techniques
  - orientation skills
  - map skills
  - cane skills,
  - use of residual vision
  - low vision devices related to travel skills
  - urban, suburban, and rural travel,
  - travel in business districts,
  - procedures for crossing streets including how to deal with traffic control signals,
  - use of public transportation systems,
  - procedures for use of the telephone for information gathering and for emergencies,
  - procedures for interacting with the public
  - knowledge and application of community address systems,
  - procedures for travel and independent functioning in places of public accommodation,
  - skills of daily living,
  - sensory/motor skills in coordination with the physical or occupational therapist and teacher of visually impaired students, and
  - skills for independent living.
