TEXAS SCHOOL FOR THE BLIND AND VISUALLY IMPAIRED (771)

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Entity

The Texas School for the Blind and Visually Impaired is an agency of the State of Texas and its financial records comply with state statutes and regulations. This includes compliance with the Texas Comptroller of Public Accounts' Reporting Requirements of State Agencies and Universities.

The Texas School for the Blind and Visually Impaired was originally established by the Texas Legislature in 1856 as the Texas Institution for the Blind. The Institution's name was changed to the Texas State School for the Blind in 1907. In 1915 it was changed to the Texas School for the Blind, and in 1989 it was again changed to the Texas School for the Blind and Visually Impaired. The School operated under the oversight authority of the State Board of Education and the Texas Education Agency until September 1, 1981, when Senate Bill 29 of the Sixty-Seventh Legislature established Texas School for the Blind and Visually Impaired as a separate entity governed by a nine-member board.

The combined financial statements of the Texas School for the Blind and Visually Impaired include all the accounts of all operations of the School's reporting entity, and the Board of the School is the governing authority of this reporting entity. By state statute, the nine members of the Board are appointed by the Governor and confirmed by the Senate of the State of Texas; however, these elected officials do not maintain a significant continuing relationship with TSBVI with respect to carrying out its important public functions. As the School's governing authority, the TSBVI Board powers include budgetary authority and authority over other fiscal and general management of the School which includes, but is not limited to, the authority to execute contracts, approve the hiring or retention of key management personnel, exercise control over facilities and properties, and determine the outcome of disposition of matters affecting the recipients of the services being provided.

The Texas School for the Blind and Visually Impaired provides educational, residential and related services to any Texan students who are blind, deafblind, or have low vision who cannot be appropriately served in their local school district.

Due to the statewide requirements embedded in Governmental Accounting Standards Board Statement No. 34, *Basic Financial Statements-and Management's Discussion and Analysis-for State and Local Governments*, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in this statement. The financial report is considered for audit by the State Auditor as part of the audit of the state's Annual Comprehensive Financial Report (ACFR); therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

Blended Component Units

Texas School for the Blind and Visually Impaired does not have any blended component units.

Discretely Presented Component Units

Texas School for the Blind and Visually Impaired does not have any discretely presented component units.

FUND STRUCTURE

The accompanying financial statements are presented on the basis of funds, each of which is considered a separate accounting entity.

Governmental Fund Types & Government-Wide Adjustment Fund Types

General Revenue Funds

The General Revenue Fund serves as the general operating fund of the School. It includes all financial resources except those required to be accounted for in another fund. The General Revenue Fund is composed primarily of appropriations from the State's General Revenue Fund, apportionments from the State's Available and Foundation School Funds, and revenues from federal assistance programs, state assistance programs, and curriculum book sales.

Special Revenue Funds

Special Revenue funds are used to account for the proceeds of specific revenue sources (other than for private-purpose trusts or for major capital projects) that are legally restricted to use for specified purposes. Special Revenue funds include the Expendable Trust Fund-Legacy (GAAP Fund 9999, Fund 0018).

Permanent Funds

Permanent Funds are used to account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the state's programs. The Permanent Fund includes the Non-Expendable Trust Fund-Legacy (GAAP Fund 9999, Fund 0021).

Capital Asset Adjustment Fund Type

Capital Asset Adjustment fund type will be used to convert governmental fund types' capital assets from modified accrual to full accrual (GAAP Fund 9998, Fund 0019).

Long-Term Liabilities Adjustment Fund Type

Long-Term Liabilities Adjustment fund type will be used to convert governmental fund types' debt from modified accrual to full accrual (GAAP Fund 9997, Fund 0020).

Fiduciary Fund Types:

Fiduciary funds account for assets held by the state in a trustee capacity or as an agent for individuals, private organizations, other governmental units, and/or other funds. When assets are held under the terms of a formal trust agreement, either a pension trust fund, or a private purpose trust fund is used.

Agency Funds

Agency Funds include Student Activity and Student Trust funds.

Basis of Accounting

The basis of accounting determines when revenue and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental fund types are accounted for using the modified accrual basis of accounting. Under the modified accrual basis, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year end.

The State of Texas considers receivables collected within sixty days after fiscal year-end to be available and recognizes them as revenues of the current year for fund financial statements prepared on the modified accrual basis. Expenditures and other uses of financial resources are recognized when the related liability is incurred.

Governmental adjustment fund types that will build the government-wide financial statements are accounted for using the full accrual basis of accounting. This includes capital assets, accumulated depreciation, unpaid employee compensable leave, the unmatured debt service (principal and interest) on general long-term liabilities, long-term capital leases, long-term claims and judgments and full accrual revenues and expenses. The activity will be recognized in these fund types.

Budget and Budgetary Accounting

The budget is prepared biennially and represents appropriations authorized by the Legislature and approved by the Governor (the General Appropriations Act).

Unencumbered appropriations are generally subject to lapse 60 days after fiscal year-end for which they were appropriated.

Assets, Liabilities, and Fund Balances/Net Position

ASSETS

Cash and Cash Equivalents

Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Investments

Investments are generally stated at fair value with certain exceptions in accordance with GASB Statement No. 72 *Fair Value Measurement and Application*.

Capital Assets

Assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year are capitalized. These assets are capitalized at cost or, if purchased, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all "exhaustible" assets. "Inexhaustible" assets (such as works of art and historical treasures) are not depreciated. Assets are depreciated over the estimated useful life of the asset using the straight-line method.

All capital assets acquired by proprietary fund or trust funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated capital assets are reported at acquisition value. Depreciation is charged to operations over the estimated useful life of each asset, using the straight-line method.

Current Receivables-Other

Other receivables include year-end revenue accruals not included in any other receivable category. This account can appear in governmental fund types.

LIABILITIES

Accounts Payable

Accounts Payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

Current Payables-Other

Other payables are the accrual at year-end of expenditure transactions not included in any of the other payable descriptions. Other payables may be included in either the governmental or proprietary fund types.

Employees' Compensable Leave Balances

Employees' Compensable Leave Balances represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or non-current in the statement of net position. These obligations are normally paid from the same funding source from which each employee's salary or wage compensation was paid.

FUND BALANCE/NET POSITION

“Fund Balance” is the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources on the governmental fund statements. “Net Position” is the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources on the government-wide, proprietary and fiduciary fund statements.

Fund Balance Components

Fund balances for governmental funds are classified as nonspendable, restricted, committed, assigned or unassigned in the fund financial statements.

Non-spendable Fund Balance

Non-spendable fund balance includes amounts not available to be spent because they are either not in spendable form or legally or contractually required to be maintained intact. This type includes farmland.

Restricted Fund Balance

Restricted fund balance includes those resources that have constraints placed on their use through external parties-such as creditors, grantors, contributors, laws or regulations of other governments- or by law through constitutional provisions. This type includes ARRA (American Recovery & Reinvestment Act), Unappropriated and Legacy.

Assigned Fund Balance

Assigned fund balance includes amounts constrained by the state’s intent to be used for specific purposes, but the constraints do not meet the requirements to be reported restricted or committed. Intent is expressed by the Texas Legislature or a body or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes.

Unassigned Fund Balance

Unassigned fund balance is the residual classification for the general fund. This classification represents fund balance that was not restricted, committed or assigned to specific purposes within the general fund.

Restricted Net Position

Restricted net position results when constraints placed on net resources are either externally imposed by creditors, grantors, contributors and the like or imposed by law through constitutional provisions or enabling legislation.

INTERFUND ACTIVITIES AND BALANCES

The agency has the following types of transactions between funds:

- (1) Transfers: Legally required transfers that are reported when incurred as ‘Transfers In’ by the recipient fund and as ‘Transfers Out’ by the disbursing fund.
- (2) Reimbursements: Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one fund for another that are recorded as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund. Reimbursements are not displayed in the financial statements.
- (3) Interfund receivables and payables: Interfund loans are reported as interfund receivables and payables. If repayment is due during the current year or soon thereafter, the balance is classified as “current”. Balances for repayment due in two (or more) years is classified as “noncurrent”.

The composition of the agency’s Interfund activities and balances are presented in Note 12.

Federal Assistance

TSBVI receives federal financial assistance for specific purposes that are subject to review or audit by the federal grantor agencies. Entitlement to this assistance is generally conditional upon compliance with the terms and conditions of grant agreements and applicable federal regulations, including the expenditure of assistance for allowable purposes. Such audits could lead to requests for reimbursements to grantor agencies for expenditures disallowed under the terms of the grant. Based on prior experience, management believes such disallowance (if any) will be immaterial.
